

75 Tactical Extrication Tips in 75 Minutes

Instructor: Les Baker

Establishing command, sizing up the incident, and formulating a plan based on good strategies is necessary to proficiently and safely mitigate an MVC and remains constant regardless of the severity of the entrapment and/or patient condition. In addition, responders must have the knowledge and skill to complete tasks at the tactical level. This presentation provides 75 tactical level tips to better prepare responders for the challenges of today's extrication incidents. Each street level tip is presented through case studies with pictures and videos to provide information that can be directly applied to your next extrication incident. This high tempo presentation covers the entire extrication process from preparation to termination and the simple, cost effective tips that can be applied at any department.
