Tom Hall Bio

Technical Director – Natural Resources, The Zurich Services Corporation

Tom is the Technical Director of Natural Hazard issues for The Zurich Services Corporation. He is a Risk Engineer and loss prevention specialist with 26 years of experience in the loss-control industry. His primary responsibilities include managing technical guidance for Risk Engineering programs related to all natural hazards. Tom leads the development and implementation of property loss-prevention strategies designed to drive down the total cost of risk and reduce losses caused by weather and natural hazards. He is a subject matter specialist on property loss prevention, as well as control techniques associated with natural hazards: the perils of wind, water, collapse and earthquake. Tom consults on numerous projects in areas exposed to extreme wind events and provides technical support to field engineering staff as they evaluate natural hazard exposures.
